Current

- Local data storage
- Unique site data

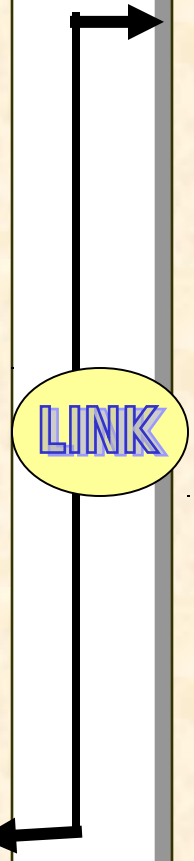
Future

- Central repository
- Local data “mirror”
- Data integrity
- Benefits

Data Elements

OHI

- OHI Policy Information
- Policy Holder Name, SSN
- Patient Relationship to Policyholder
- Policy Active Effective and Expiration Date
- Plan Type
- Plan Coverages
- Group Employer Contact Info
- INSCO Standard Code



SIT

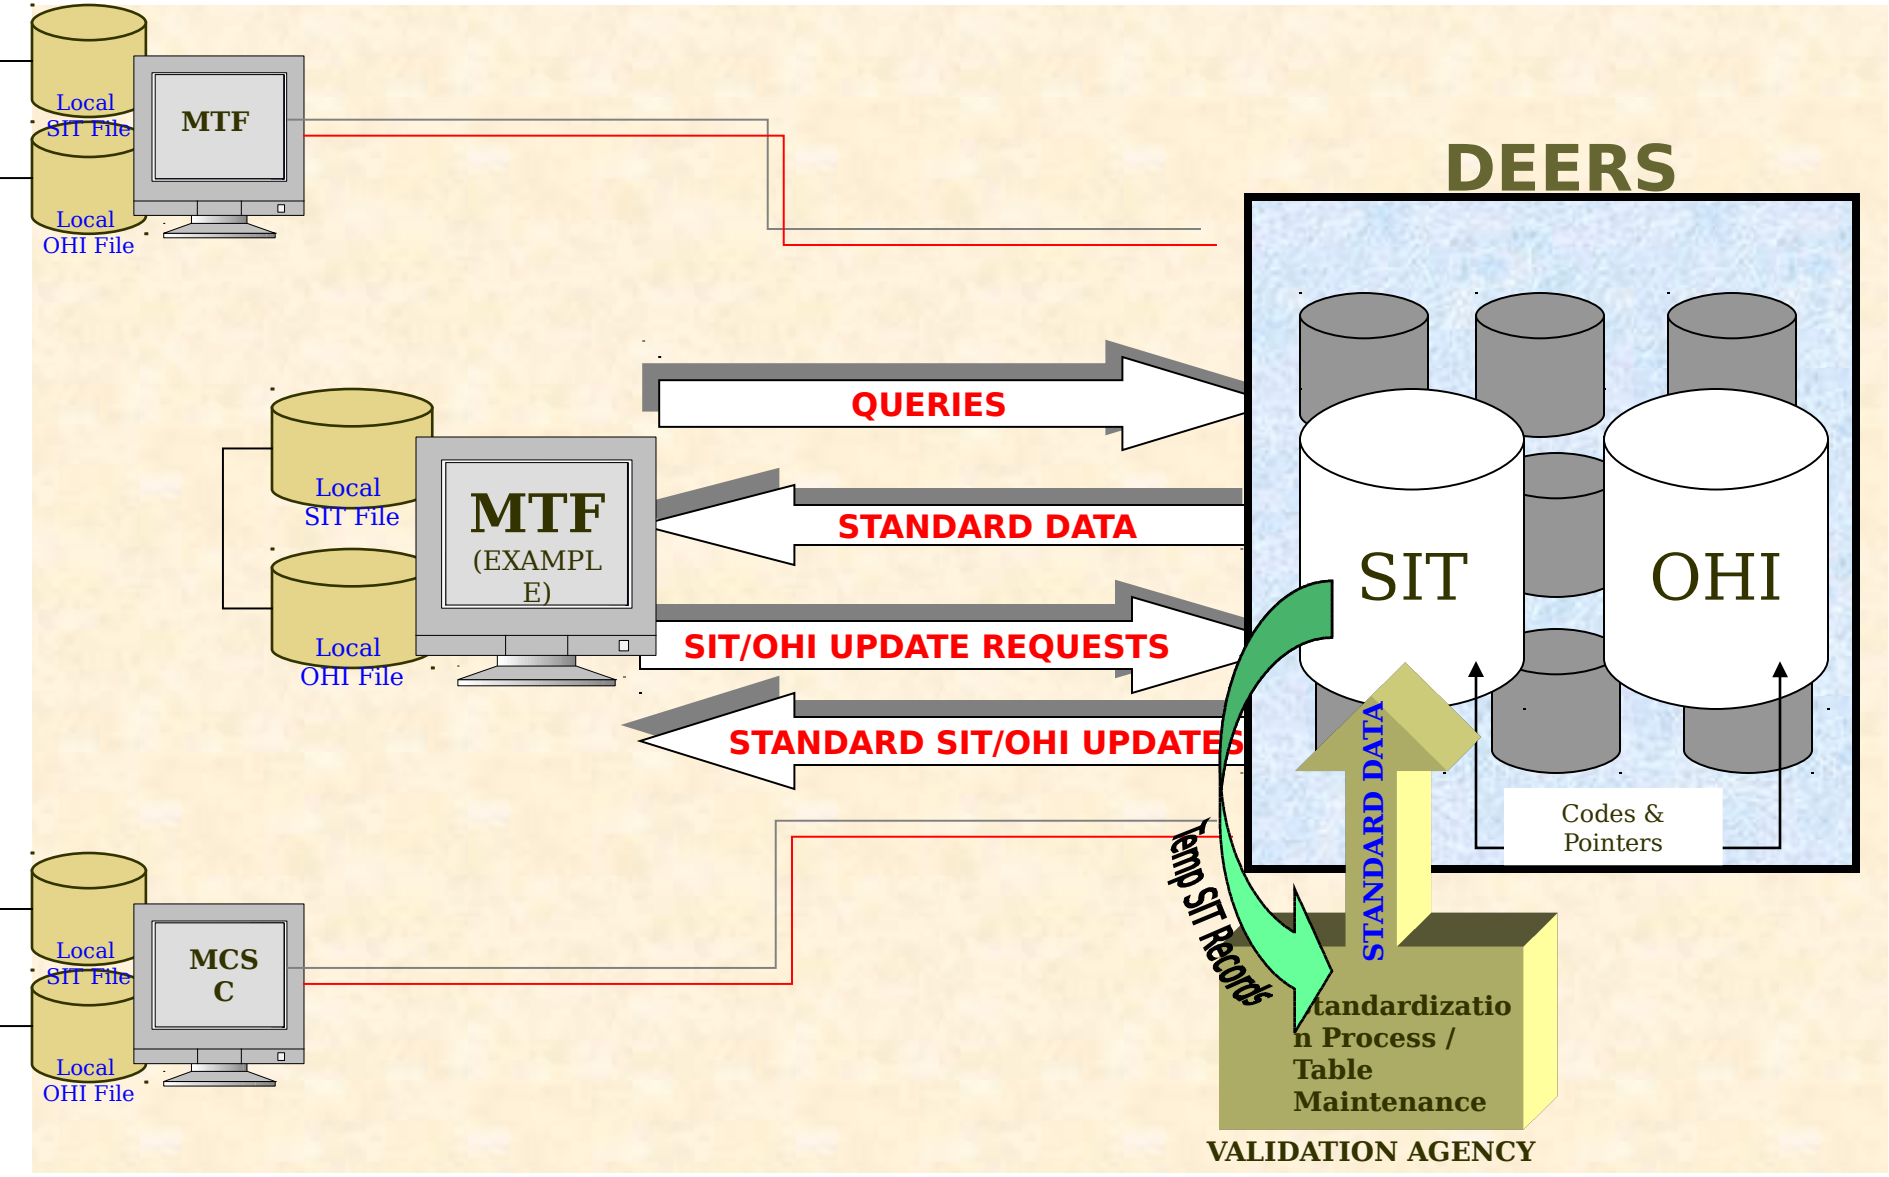
- INSCO Standard Code
- INSCO Name
- Claims Address
- Claims submission comments /helpful hints (standardized)
- Customer Service Contact information

SIT / OHI Users

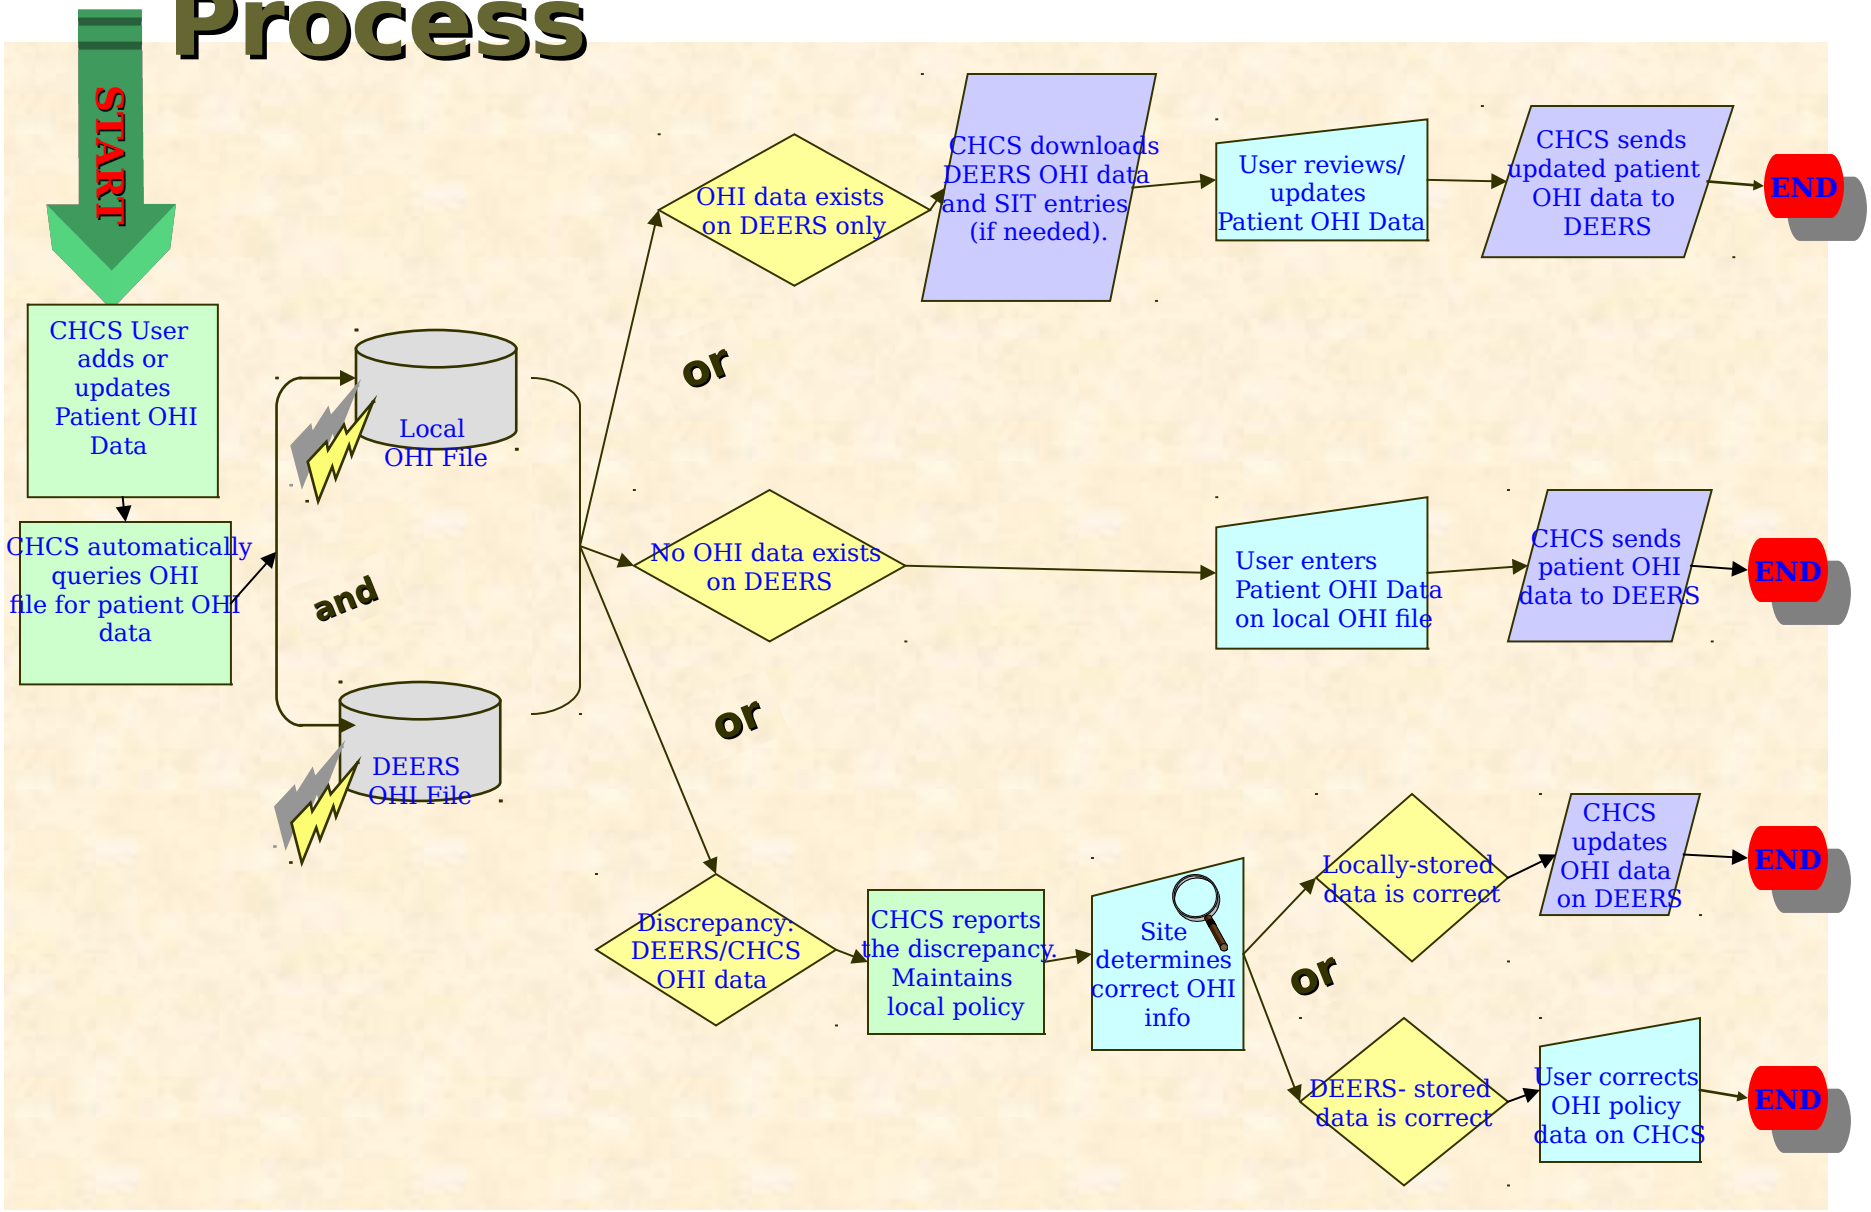
CHCS

MCSCs

SIT and OHI Data Flow



Basic OHI Transaction Process

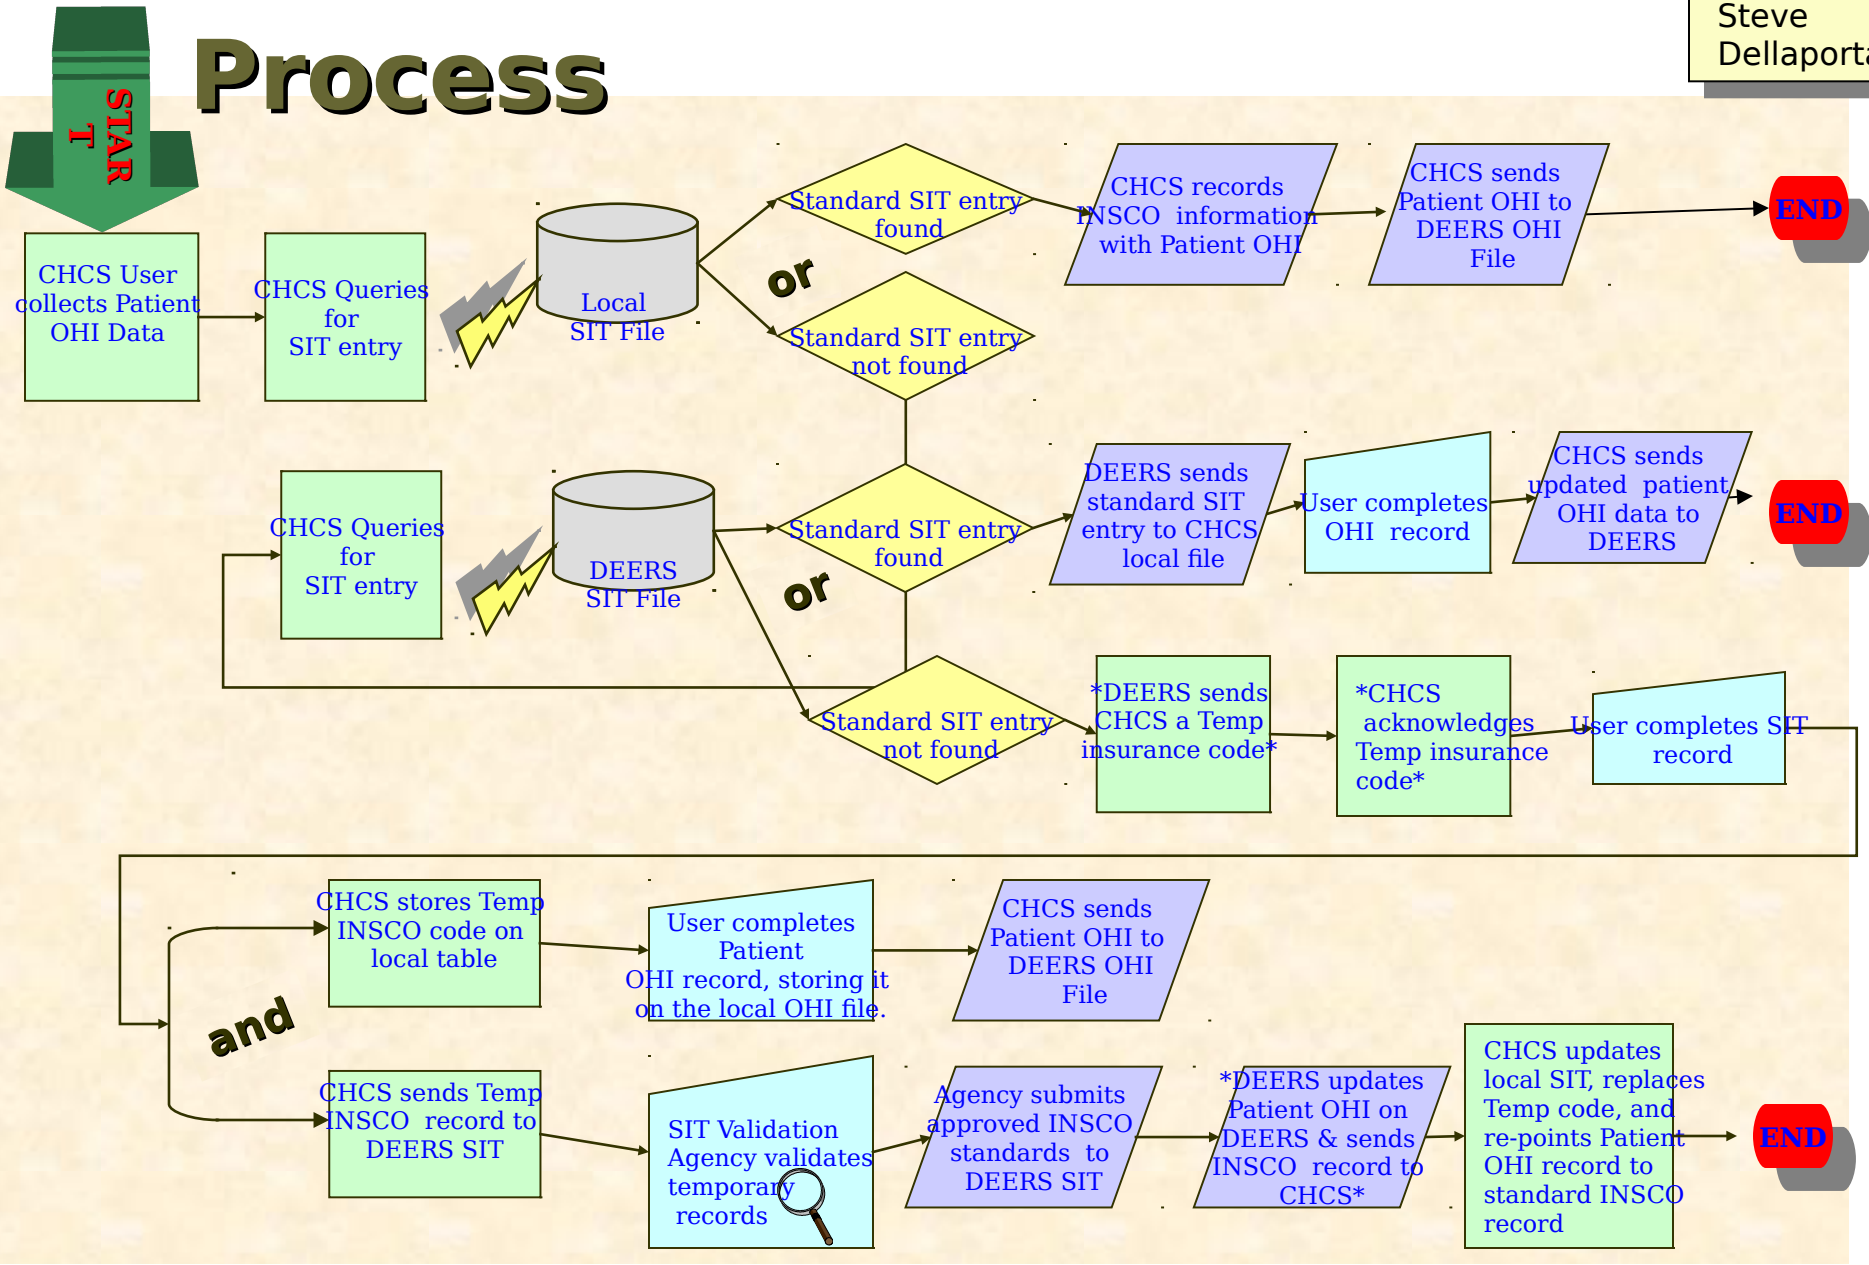


START
CHCS User adds or updates Patient OHI Data
CHCS automatically queries OHI file for patient OHI data
Local OHI File
and
DEERS OHI File
OHI data exists on DEERS only
or
CHCS downloads DEERS OHI data and SIT entries (if needed).
User reviews/ updates Patient OHI Data
CHCS sends updated patient OHI data to DEERS
END
No OHI data exists on DEERS
or
User enters Patient OHI Data on local OHI file
CHCS sends patient OHI data to DEERS
END
Discrepancy: DEERS/CHCS OHI data
CHCS reports the discrepancy. Maintains local policy
Site determines correct OHI info
Locally-stored data is correct
CHCS updates OHI data on DEERS
END
or
DEERS- stored data is correct
User corrects OHI policy data on CHCS
END

Basic SIT Transaction Process

gescario:

*edited by Steve Dellaporta



START
CHCS User collects Patient OHI Data
CHCS Queries for SIT entry
Local SIT File
Standard SIT entry found
or
Standard SIT entry not found
CHCS records INSCO information with Patient OHI
CHCS sends Patient OHI to DEERS OHI File
END
CHCS Queries for SIT entry
DEERS SIT File
Standard SIT entry found
or
Standard SIT entry not found
DEERS sends standard SIT entry to CHCS local file
User completes OHI record
CHCS sends updated patient OHI data to DEERS
END
DEERS sends CHCS a Temp insurance code
CHCS acknowledges Temp insurance code
User completes SIT record
and
CHCS stores Temp INSCO code on local table
User completes Patient OHI record, storing it on the local OHI file.
CHCS sends Patient OHI to DEERS OHI File
CHCS sends Temp INSCO record to DEERS SIT
SIT Validation Agency validates temporary records
Agency submits approved INSCO standards to DEERS SIT
DEERS updates Patient OHI on DEERS & sends INSCO record to CHCS
CHCS updates local SIT, replaces Temp code, and re-points Patient OHI record to standard INSCO record
END
